Karla,

I think calling in will be fine. Actually, we can call you if you provide a number. I'm just wondering if you've been able to access the gw database and if you have any revisions to the table that you provided to Lily, or if your thoughts on those wells still stand? I'm just going through the data and past gw monitoring reports now. I just realized that the Navy also indicates that in some of the gw wells they've changed the analytes to be analyzed (eliminated some). I think reviewing that list will have to be our next task.

Nina

Hi Lily,

If you really need me, I could be available by conference call.

I will be working on the IR-26 Mercury comments, Amy's Parcel G stuff, and the IR-03 comments that day, so it's already a pretty full day.

Please advise.

Hi Lily, Bradley and Marie,

In light of the inavailability of the Navy personnel late afternoon, can we do this as a conference call at 10 a.m. on Tuesday?

Also, to be clear, while it will be helpful to have people from the Navy who can help address some of these issues, we also want to be able to ask questions of knowledgeable staff from EPA and if possible DTSC, as these issues are ones that also involve their oversight of the Responsible Party.

To assist in the conversation, we intend to send to you in advance, for forwarding to the other participants, a few selected pages from key documents.

Thanks,

Daniel Hirsch

The Navy let me know that their radiation experts are located on the east coast, where 4 pm would be 7 pm for them. Is it possible to talk earlier in the day? We can host the meeting at USEPA if you like for those who can join in person. We can call the others from here. Would that work?
